

APP REDESIGN

GET LUCKY GOLF

Full redesign of the player app for public beta. Get Lucky V2.

Get Lucky Golf lets South African golfers stake R50–R1,000 on a hole-in-one and win up to R1,000,000, underwritten by Indwe Risk Services. The app works end to end. The visual layer was never designed — it grew out of the build. We want you to design it.

Not a reskin: the visual language, the structure of every screen, iconography, motion, and how the brand behaves in a product rather than on a poster.

THREE THINGS THAT CHANGE HOW YOU'D APPROACH THIS

- 1 • **Today's screens are a reference for what the app does, not how it should look.** The 27 surfaces are a checklist of jobs the product has to do. If two should be one screen, or one should be two, propose it — there's a template for that. Don't inherit any of the current composition.
- 2 • **The brand is open, wordmark included.** The script lockup was drawn for print and signage, where it's never asked to survive at 24px, sit in a tab bar, or animate. You may repoint the palette and evolve the mark so it works in a product. It should still read as Get Lucky — this isn't a rebrand. There is no icon-only mark today, and that's the single most valuable thing you could draw for us.
- 3 • **Stage 0 is directions, not 27 screens.** Two or three whole-app visual directions on the same two screens, with a short rationale each. We pick one, then you go deep. Loose directions cost a fraction of one resolved screen and they're how we avoid a redesign going the wrong way at screen twenty.

WHAT YOU DELIVER

Flat PNG comps at 750px wide, a redline twin with numbered circles, and a one-page card per screen. Two token spreadsheets, already filled in with today's values — blank means unchanged. A logo set including that icon-only mark. An icon set replacing the thirteen emoji currently doing interface work.

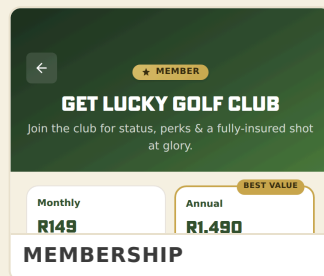

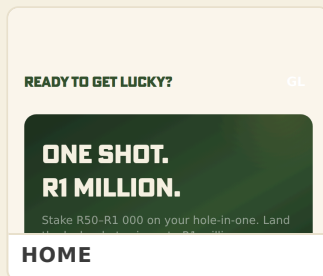

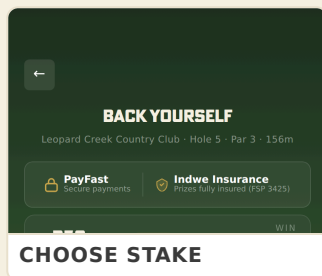

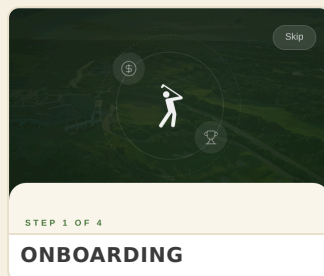

WHAT'S FIXED

The 18+ gate blocks real-money play • the Indwe sponsor stays visible • legal links stay reachable • the six stake tiers keep their exact amounts (R50→R25,000 • R100→R60,000 • R150→R100,000 • R250→R200,000 • R500→R500,000 • R1,000→R1,000,000) • payment hands off to PayFast • 44pt tap targets • 4.5:1 text contrast.

Those are legal and contractual. Where they sit and what they look like is entirely yours.

THE APP TODAY

A reference for what it does, not how it should look. Twenty screens are in the pack.

The design pack — screenshots of the app as it stands, the token sheets, screen cards, the asset spec and the logo files. **Start with** [README.md](#). The full brief is in there too if you want the detail behind any of this.
